

PATCH MANAGEMENT

for all of your Micro Focus and SUSE products

PATCH MANAGEMENT FOR MICRO FOCUS AND SUSE PRODUCTS

Concensus has created an offering for specifically patching SUSE and Micro Focus products. We will keep your systems up to date, healthy, and giving you back valuable time. Our service includes scheduled vulnerability scans. We can perform these on a monthly or quarterly schedule.

OUR PROCESS:

INCLUDED WITH A MONTHLY OR QUARTERLY SUBSCRIPTION:

- Perform a vulnerability scan for included systems
- Create a baseline that will bring all your products up to date
- Update you to the latest versions
- Create an SMT repository for approved patching (On-premise/Concensus Cloud)
- Perform upgrades and vulnerability scans on a scheduled basis

VALUE ADDED SERVICES (Additional Fees Apply)

- System monitoring and reporting (Linux, Windows, VMWare)
- Backup, disaster recovery and business continuity (On-premise/Concensus Cloud)
- Managed SIEM for log monitoring (On-premise/Concensus Cloud)
